

Problem Set 1

Srinidhi Palwayi

September 2018

1 Crop Circles

2 WDC

The points are in wdc1.npy and wdc2.npy

3 My Graphic

Original

Final Mosaic

Used left.npy and right.npy, for the points to compute H matrix

Used left.jpg and right.jpg

4 Replaced Surface

Replaced the surface of a roof on Picasso cubist painting with splatter paint

Original images

Used picasso.npy and rect.npy, for the points to compute H matrix
picasso.jpg, and scream.jpg are the images used
Final image

5 Infrastructure

points.py handles the logic for selecting points, need to change the displayed images every time and the name of the location that the points are saved at

driver.py handles the logic for calling the functions Run python driver.py to see all the images made
